November 15, 2011

The Honorable Jim Jordan
Chairman
U.S. House Republican Study Committee
U.S. Capitol
Washington, DC 20515

Dear Chairman Jordan:

Americans for Limited Government supports the Jobs through Growth Act as a good start toward tackling some of the root causes of our nation's economic stagnation.

Incredibly some of your colleagues believe that the best way to create lasting, fulfilling private sector jobs in America is to increase taxes and double down on a regulatory regime that sacrifices the American worker on the altar of government excess.

The Republican Study Committee's Jobs through Growth Act tackles our nation's national debt problem responsibly by cutting away many of the obstacles to job creation in America. The job strangling regulations and taxes imposed by our federal government create a self-fulfilling prophecy of government dependency, which must be ripped out by its roots if our nation is to thrive in the future.

Americans for Limited Government looks forward to working with you in support of your effort to begin the liberation of our nation's free enterprise system from the tight grip of government.

Sincerely,

William A. "Bill" Wilson
President
